

Buyer pack

# Sourcing grain from Amuru, Uganda

This pack combines Normah's product specification with capacity, logistics and documentation detail for buyers evaluating the farm as a supplier.

## Crop specifications

| Crop       | Season(s) | Planting window       | Harvest window             | Primary market                                             | Packaging                      |
|------------|-----------|-----------------------|----------------------------|------------------------------------------------------------|--------------------------------|
| Maize      | A & B     | Early in each season  | Mid-to-late in each season | Export and regional trade                                  | 50 kg woven polypropylene bags |

| Rice       | B         | Early Season B        | Late Season B              | Export and regional trade                                  | 50 kg woven polypropylene bags |
| Sesame     | B         | Early-to-mid Season B | Late Season B              | Export — named as simsim in regional and Middle East trade | 50 kg woven polypropylene bags |
| Sorghum    | A & B     | Early in each season  | Mid-to-late in each season | Regional and export trade                                  | 50 kg woven polypropylene bags |
| Millet     | A         | Early Season A        | Mid-to-late Season A       | Regional trade                                             | 50 kg woven polypropylene bags |

## Capacity & availability

Availability follows the two-season calendar above; see each crop's season assignment for timing. Standard packaging is 50 kg woven polypropylene bags (TBC — verify bulk/container options with the client).

## Logistics

Road route from Amuru to Kampala for domestic handling and onward logistics. Road route north on the Gulu–Elegu/Nimule corridor for South Sudan-bound shipments. Port options via Mombasa or Dar es Salaam for containerised export (TBC — verify preferred port and forwarding agent).

## Documentation & terms

Dispatch documentation traces every shipment to its batch and plot of origin. Export shipments require phytosanitary documentation, currently in progress. Payment terms and incoterms are confirmed per order (TBC — client to confirm).

# Geography

Amuru sits on the road corridor toward the Elegu/Nimule crossing into South Sudan, close to regional demand and Uganda's bimodal rainfall advantage over single-season producers.
